

Artificial Intelligence in everyday life

① Watch the video and complete the following tasks.

② Fill in the blanks.

Machines are intelligent if they are incorporated with intelligence to perform tasks like humans do.

③ Which of the following forms of AI ...

	have you already used	would you use if available	would you never want to use
in mobile phones	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
in cars	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
in social media	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
in computer games	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
in banking	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
in surveillance	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

④ Which of the following abilities make up artificial intelligence?

- Problem solving
- Thinking
- Generalized learning
- Reasoning

⑤ Which of the below AI projects don't exist yet?

- An AI robot with citizenship
- AI that develops emotions over time
- A robot with a muscular skeletal system
- AI that can read its owners emotions

⑥ Fill in the blanks.

Machine learning is a to achieve artificial intelligence. Deep learning is a of machine learning. Machine learning provides a machine with the capability to learn from and through algorithms. Deep learning learns through ways inspired by the . Through deep learning data and can be better perceived.
