If I understood the different if-clauses...

What are if-clauses?

If-clauses are conditional clauses.

Meaning:

The happening in the **main clause** (*clause without the if*) can **only** take place when the condition is fulfilled in the **if clause**.

The difference between type 1 & type 2

It is **possible** and **very probable** for the described situation to happen. **Structure**: **if** + **simple present**, **willfuture** (**will+ infinitive**)

[If clause type 2

It is **possible** but **rather unlikely** for the described situation to happen. **Structure: if** + **simple past**, **conditional** 1 (=would + infinitive) **Example: If I studied** everyday, **I**

Notice: The main clause can also stand in the begining!

Example: I will pass all my exams **if I study** everyday.

Example: I would pass all my exams if I studied everyday.

If you understand them, you will use the if-
