

2er und 3er Reihe: Mal

1 Berechne!

$2 \cdot 4 = \square$

$2 \cdot 5 = \square$

$2 \cdot 8 = \square$

$2 \cdot 3 = \square$

$2 \cdot 6 = \square$

$2 \cdot 7 = \square$

$2 \cdot 9 = \square$

$2 \cdot 2 = \square$

$2 \cdot 6 = \square$

2 Berechne!

$3 \cdot 4 = \square$

$3 \cdot 7 = \square$

$3 \cdot 9 = \square$

$3 \cdot 8 = \square$

$3 \cdot 3 = \square$

$3 \cdot 6 = \square$

$3 \cdot 6 = \square$

$3 \cdot 5 = \square$

$3 \cdot 8 = \square$

3 Berechne!

$2 \cdot 3 = \square$

$6 \cdot 2 = \square$

$3 \cdot 6 = \square$

$4 \cdot 2 = \square$

$3 \cdot 5 = \square$

$2 \cdot 9 = \square$

$4 \cdot 3 = \square$

$2 \cdot 2 = \square$

$3 \cdot 8 = \square$

2er und 3er Reihe: Durch und Ergänzen

4 Berechne!

$6 : 2 = \square$

$10 : 2 = \square$

$2 : 2 = \square$

$12 : 2 = \square$

$8 : 2 = \square$

$16 : 2 = \square$

$18 : 2 = \square$

$14 : 2 = \square$

$4 : 2 = \square$

5 Ergänze!

$2 \cdot \square = 4$

$2 \cdot \square = 14$

$2 \cdot \square = 20$

$2 \cdot \square = 18$

$2 \cdot \square = 10$

$2 \cdot \square = 12$

$2 \cdot \square = 8$

$2 \cdot \square = 16$

$2 \cdot \square = 6$

6 Ergänze!

$3 \cdot \square = 18$

$3 \cdot \square = 9$

$3 \cdot \square = 6$

$3 \cdot \square = 21$

$3 \cdot \square = 3$

$3 \cdot \square = 30$

$3 \cdot \square = 12$

$3 \cdot \square = 15$

$3 \cdot \square = 24$
