Context of the movie

The movie "Origin," directed by Ava DuVernay, is an engaging film that examines how historical injustices are linked across different cultures. Based on Isabel Wilkerson's book "Caste: The Origins of Our Discontents," it looks at the lasting impacts of American slavery, the Holocaust, and India's caste system. The film follows Wilkerson as she travels to Germany and India to study how different societies have practiced dehumanization and oppression. "Origin" encourages viewers to think about past and present issues related to race, caste, and discrimination.
